Art Unit: 1614

Claims 1, 12 and 14-23 are presented for examination.

The applicants' amendment and information disclosure statement filed July 14, 2005 have been received and entered.

Accordingly, the rejections made under obviousness-type double patenting, 35 USC 112, first paragraph and 35 USC 112, second paragraph as set forth in the previous Office action dated April 13, 2005 at pages 2-8 are hereby withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 12, 14-21 and 23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,911,442 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented application teaches compounds of Formula I and pharmaceutical compositions comprising compounds of Formula I (a product, claims 1-9), and the present application teaches a method of use claims containing the instant compounds and compositions of the patented

application therein which makes the compounds and composition claims of the patent application an obvious variation of the present application's claims. Claim 10 of the patented application (a method of treatment of bacterial infections with formula I) broadly encompassed the present application's method of treatment of bacterial infections caused by *S. aureus*, *E. faecalis*, *M. catarrhalis*, or *s. pneumoniae*.

Claims 1, 12, 14-21 and 23 are not allowed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 is rendered indefinite because the claim recites, "A process for preparing compounds of formula (IA), however, there is no formula (IA).

Claim 22 is not allowed.
